## 1. Executive Project Specification Sheet

The AI-Powered Travel Planner is a full-stack situational itinerary generator designed to eliminate the friction, time drain, and guesswork of holiday planning. It combines verified expert-curated knowledge bases for Days 1 through 3 with an algorithmic procedural engine for Days 4 through 10 across 20 premier global destinations.

| PROJECT ATTRIBUTE | OFFICIAL TECHNICAL SPECIFICATION |
|---|---|
| **Project Title** | AI-Powered Travel Planner • Smart Situational Itinerary Engine |
| **Academic Track** | AI-ML-and-GEN-AI Track • Capstone Engineering Project |
| **Live Web URL** | **https://travel-planner-iota-plum.vercel.app/** |

## 2. 6-Step Visual User Manual Walkthrough

### Step 1: Access Web App — Portal

Navigate to `travel-planner-iota-plum.vercel.app` in any browser. View the interactive landing page and click "Get Started".

### Step 2: Authenticate — Auth

Sign up with your email and secure password, or login to an existing profile. A 24-hour cryptographically signed JWT token is issued.

### Step 3: Tune 5D Filters — Preferences

Select your desired Travel Mood (Adventure, Romance), Budget Tier (Budget, Luxury), Dietary restrictions (Vegan, Halal), and Persona.

### Step 4: Pick Destination — Catalog

Browse through the 20 responsive destination cards displaying live compatibility badges and verified landmark photography.

### Step 5: Generate Itinerary — Engine

Click "Generate Itinerary". The backend returns a structured 10-day itinerary with 3-4 attractions, lunch, dinner, and daily hacks in <500ms.

### Step 6: Explore Day-by-Day — Trip Deck

Expand individual day accordion cards to review high-res Wikipedia landmark photography, daily expense estimates, and transit subway routes.

## 3. Operational FAQ & Support

**Q: Are the images authentic?** Verified

Yes. Every single one of the 304 photographs is pulled from verified Wikipedia Commons files with zero duplicate collision.

**Q: Can I use this on mobile?** Verified

Yes. The responsive Tailwind CSS interface dynamically scales down to 320px mobile displays with native-feeling touch accordions.
