## 3. 5-Scenario Disaster Recovery & Contingency Plan

| POTENTIAL RISK EVENT | IMMEDIATE IMPACT | ENGINEERED CONTINGENCY ACTION |
|---|---|---|
| **Auditorium Wi-Fi Failure** | Cloud API calls cannot reach remote server | Switch immediately to local uvicorn instance (localhost:8000) or phone LTE tether. |
| **Vercel CDN Edge Timeout** | Frontend fails to load remote assets | Switch to local static React build served via `npm start` on localhost:3000. |
| **Wikipedia API Rate Limit** | Landmark image thumbnail returns HTTP 429 | Smart fallback automatically renders local high-res curated SVG destination cards. |
| **Auth Token Expiration** | API returns 401 Unauthorized during live test | Pre-authenticated test account with 7-day token stored in browser session. |
| **Projector Aspect Ratio Bug** | Display resolution distorts desktop grid | Responsive Tailwind CSS layout automatically re-flows to tablet/mobile view cleanly. |
